Personal Biography

I am Kehinde Akindele, an Art student specializing in Graphic Design and visual communication, with a growing focus on Artificial Intelligence engineering and Cloud Computing. I approach design as both a creative and technical discipline, blending artistic expression with modern technologies to build intelligent and scalable digital solutions.

Born in August and proudly from Ekiti State, Nigeria, my background and environment have shaped my creative mindset and curiosity for innovation. These influences guide my approach to design, where visual storytelling meets technology.

Currently, I am learning AI engineering, exploring how machine learning, data-driven models, and AI-powered tools can enhance creativity, automate workflows, and solve real-world problems. Alongside this, I am developing cloud computing skills to support deployment, scalability, and collaboration. My goal is to grow into a multidisciplinary professional who combines art, design, AI, and cloud technology to create impactful and future-ready solutions.
